## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yourker US 3,639,301 or Christell et al. US Re 36,618.or Musch et al US 6,767,947.

4. The rejections set forth under 35 USC 102/103 in the paper mailed 7/24/06 are deemed proper and are herein repeated.

5. Applicants remarks filed 10/31/07 have been fully considered but have been found not persuasive.

6. Applicants continue to argue the process limitations and specifically the storage step as claimed component (b). The maintains that the patentability of the product –by- process is determined by the product being patentably distinct from the cited art. Here, there is no showing or allegation that the products are different. Applicants argue that the art does not disclose a storage step. This is not germane to the patentability of the claimed product. Further, the storage step (b) reads on the time between polymerization and use of the adhesive. The art does not apply the dispersion immediately following polymerization. As such, there is a storage time between polymerization and use. This time is seen to anticipate and/or render obvious the claim limitation.
